

# Shell Spirax S6 ATF ZM

DESIGNED TO MEET CHALLENGES

Every part of your vehicle has been meticulously engineered, so you want to use a lubricant that has been designed to ensure that your equipment is well protected and works efficiently.

The Shell Spirax range of heavy-duty automatic-transmissions fluids has been developed to enable fleet operators and owner-operators to select the oil that will deliver optimum value to their operations through wear protection, long oil life and efficiency.

## KEY BENEFITS

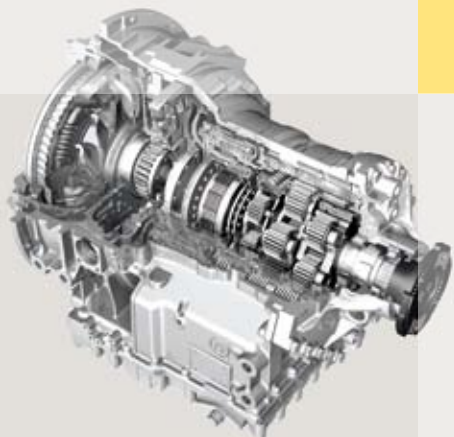

- ✓ Exceptional wear protection for longer transmission life and lower maintenance costs
- ✓ Excellent shear stability for long oil life
- ✓ Extends oil-drain interval to 150,000 km or three years, even under severe conditions, for better value and without voiding your ZF warranty
- ✓ Improved reliability in older ZF transmissions
- ✓ Excellent friction characteristics
- ✓ Counteracts shudder for smooth gear shifting and improved comfort

## A PREMIUM AUTOMATIC-TRANSMISSION FLUID FOR ZF TRANSMISSIONS

Shell Spirax S6 ATF ZM is a synthetic fluid developed by Shell Lubricants and ZF, a leading global transmission manufacturer. It is a fluid you can rely on to last for 150,000 km or three years, even under severe conditions, without risk to the transmission components or the warranty. Shell Spirax S6 ATF ZM enables you to extend oil-drain intervals with the confidence that the transmission components are protected from wear. Using Shell Spirax S6 ATF ZM can improved reliability in older ZF transmissions. It counteracts shudder for smooth gear shifts, and has a reduced-friction formula.

## DESIGNED TO PROTECT

Protecting automatic transmissions from wear, pitting and corrosion can help to extend component life and maximise your return on investment. Shell Spirax S6 ATF ZM offers exceptional protection, shear stability and friction properties that are designed to remain consistent throughout its life, thus helping to protect transmission components, even with extended oil-drain intervals.

**SHELL SPIRAX S6 ATF ZM  
WAS SPECIFICALLY  
DEVELOPED FOR  
ZF TRANSMISSIONS**

**DESIGNED FOR LONG OIL LIFE**

Limiting fluid degradation can help to prolong oil and component life. Shell Spirax S6 ATF ZM has exceptional resistance to physical and chemical breakdown, which means that it can go on protecting components for longer, thus reducing your maintenance efforts and costs.

Shell Spirax S6 ATF ZM is approved by ZF for an extended oil-drain interval of 150,000 km or three years. The fluid has excellent thermal and oxidative stability, and very good low-temperature fluidity to help ensure that it goes on protecting for extended oil-drain intervals, even under severe conditions, which can reduce your maintenance and operating costs.

**SPECIFICATIONS AND APPROVALS**

Shell Spirax S6 ATF ZM meets ZF TE-ML 4D, 14E, 16N and 20E; and MAN 339 Type Z4 (ZF Ecomat 150.000 km) requirements.

**FULL PRODUCT AND SERVICE PORTFOLIO**

Whatever your needs or application, we can provide a full range of lubricants and services, including Shell Rimula heavy-duty engine oils, Shell Gadus greases and the Shell LubeAnalyst oil and equipment condition monitoring service.

**APPLICATIONS**

 Specifically developed for ZF heavy-duty transmissions used in public service and transport applications
